## Career Objective

Frontend developer with 1.6 years of experience utilizing Vue.js and React.js to create user-friendly, responsive online applications. With experience in providing high-performance, device-optimized solutions, I am prepared to start right away.

## Professional Experience

### Frontend Developer - gofloww [🔗](#)

Feb 2024 – Present  
pune, India

- Created and maintained a console website for the accounting, mail, and human resources modules, resulting in a 75% increase in productivity and a decrease in errors. By organizing and introducing four essential features, I helped achieve an 80% increase in revenue in just three months.
- Using Vue.js, responsive user interfaces based on Figma designs were created, guaranteeing smooth desktop and mobile operation.
- Added real-time analytics to the work assignment and attendance monitoring functions. completed other projects, including the Raru Group website, and transformed Figma designs into useful, responsive web apps.

### MERN Stack Developer - Skillhub IT Solutions

Feb 2023 – Oct 2023  
ch. sambhajinagar, India

- Implemented the use of sophisticated analytics tools to track user behavior on the e-commerce platform; the data's insights resulted in targeted feature improvements that increased conversion rates by 30%.
- To support an e-commerce site, I designed reliable database solutions using Node.js and MongoDB. I also created structured querying procedures that reduced response times by 30% during periods of high traffic.

## Projects

### YouTube Clone, Modern UI with React.js & Real-time Data Integration [🔗](#)

- Using React.js, Tailwind CSS, and Rapid API, a completely functional and responsive YouTube clone was designed and constructed. created a smooth and simple user experience by utilizing React ideas like JSX, components, state, and Context API. GitHub repository [🔗](#)

### E-commerce, MERN E-commerce Platform [🔗](#)

- Developed an e-commerce platform with Razorpay for safe transactions, admin dashboards, Gmail connection, and user verification. The platform was created from scratch in 78% of cases, guaranteeing a flawless user experience and functioning.

### Tic-Tac-Toe, JavaScript Tic-Tac-Toe Project [🔗](#)

- Using JavaScript, Bootstrap, and GSAP animations, an entertaining Tic-Tac-Toe game was created. Within the first month of launch, real-time score updates increased user involvement metrics by 30%. GitHub repository [🔗](#)
