- MS-CIT
- ISRO "Overview of Geoprocessing using Python" (participating online course) 🔗

PROFESSIONAL EXPERIENCE

Front-End Developer

Skillhub it solution

2023/01 – present | Aurangabad, India

- I worked on utilizing **CSS frameworks** to create responsive landing pages, implementing a **single-page application** using ReactJS
- working on an e-commerce application. managing state with **Redux**, implementing authentication, integrating APIs with **Axios**, and **login authentication**, CSS using like a css frameworks tailwind css, mui, bootstrap-5, rest API backend and it's front end to integrate the data grid, **pagination** changing api parameters based on page number clicked. for improved design and **user experience**.

PROJECTS

Youtube-clone 🔗

- Developed a YouTube clone with **React.js**, **Rapid API for real-time data**, and Tailwind CSS for responsive design. Created a fully functional **single-page application** resembling YouTube's interface. Github-repo 🔗
- Used React.js (**JSX, components, props, state**) for a smooth UI. Enhanced user experience through conditional rendering and lists.
- **Efficient data management** via the Context API.
- Advanced **JavaScript logic** for interactivity and aesthetics.

E-commerce 🔗

- Developed a **MERN stack** E-commerce platform leveraging React.js, Redux, Material-UI, Node.js, Express.js, and MongoDB.
- **Authentication implementation** for secure user access. **Integrated payment gateway** using Razor pay for seamless transactions. **Enabled Gmail functionality** for efficient communication.
- **Product CRUD** Operations ensuring smooth inventory management. Github-repo 🔗
- Crafted an **administrative dashboard**.

Tic-Tac-Toe 🔗

- Developed a Tic-Tac-Toe game using **ReactJS** and **Bootstrap-05**, ensuring responsiveness across various devices. GitHub-repo 🔗
- Employed GSAP animations to enhance **interactive features**, while leveraging JavaScript for seamless **game functionality**.
